This six hour workshop will address the techniques used to debrief adults and children who witnessed or experienced a traumatic event such as a shooting, bus accident, hostage situation, etc. Experiential techniques will be utilized to demonstrate key information and skill building, including a mock debriefing.

This workshop is appropriate for psychologists, counselors, social workers, nurses, administrators, teachers, police officers, firemen, EMTs.

Outcomes of a debriefing are: Normalize everyone's responses; Identify those who need referral to outside professionals; participants identify triggers for stress response, personal stress reactions, and additional coping strategies.

OBJECTIVES

Participants will be able to:

- Describe adult and children's responses to trauma.
- Identify critical incident stress indicators and post-traumatic stress indicators.
- Model appropriate techniques for debriefing adults and children.
- Make appropriate referrals of high-risk participants.
- Coach participants in coping strategies when triggered.
- Identify participants who need referral to outside professionals
